A GLOBAL LEADER IN MATERIAL HANDLING SINCE 1956

Since 1956, Hangcha Group continues to engineer and manufacture high quality forklifts and warehouse equipment. This experience, combined with product innovation, has led Hangcha Group to become the eighth largest material handling OEM in the world. Hangcha Group provides a full line of material handling equipment, automated systems, and battery manufacturing both domestically and internationally which have lead to an 11% global marketshare and a worldwide distribution network.

INNOVATION THROUGH R&D AND AUTOMATED MANUFACTURING

Hangcha Group offers a true full line of quality, state-of-the-art material handling equipment. To ensure that their products meet the reliability that Hangcha is known for, Hangcha continues to use R&D, smart manufacturing techniques, and advanced testing. By using these methods, Hangcha is able to build industry-leading, reliable equipment that is tailored to their individual markets. Hangcha's advanced equipment is available to end-users at an affordable cost thanks to Hangcha's vertical integration and automated manufacturing. Together, these decisions have led to Hangcha Group being considered a global leader in material handling equipment manufacturing.

HC FORKLIFT AMERICA CORPORATION

As a part of Hangcha's globalization strategy, HC Forklift America Corporation (HCFA) was founded in Charlotte, NC. Since 2017, HCFA has built a nationwide dealer network, distribution centers in key locations within the United States, a large parts distribution warehouse in Rock Hill, SC that features an AS/RS system, parts distribution centers in key locations within the United States, and a team of aftermarket support personnel to ensure that our dealers and end-users receive the technical support and parts needed to keep their equipment running. This culminates in a U.S. based team being able to successfully sell and support Hangcha's product line for our customers.

HANGCHA'S FULL LINE OF LITHIUM-ION MATERIAL HANDLING EQUIPMENT

As a part of Hangcha's New Energy Initiative, Hangcha developed a full line of Lithium Iron Phosphate (LiFePO₄) powered material handling equipment. These battery systems, manufactured by Hangcha, allows users to make the switch from both lead-acid or I.C. powered equipment to rapid charging, long lasting, maintenance-free, lithium-ion equipment. This equipment provides end-users with efficient equipment that can run in applications ranging from light duty through harsh multi-shift applications while also providing a substantial ROI.
