HANGCHA'S GLOBAL PRESENCE

HANGCHA

HANGCHA GROUP: A GLOBAL LEADER IN MATERIAL HANDLING SINCE 1956

Since 1956, Hangcha Group continues to engineer and manufacture high quality forklifts and warehouse equipment. This experience, combined with product innovation, has led Hangcha Group to become the eighth largest material handling OEM in the world. Hangcha Group provides a full line of material handling equipment, automated systems, and battery manufacturing both domestically and internationally which have lead to an 11% global marketshare and a worldwide distribution network.

HANGCHA GROUP: INNOVATION THROUGH R&D AND AUTOMATED MANUFACTURING

Hangcha Group offers a true full line of quality, state-of-the-art material handling equipment. To ensure that their products meet the reliability that Hangcha is known for, Hangcha continues to use R&D, smart manufacturing techniques, and advanced testing. By using these methods, Hangcha is able to build industry-leading, reliable equipment that is tailored to their individual markets. Hangcha's advanced equipment is available to end-users at an affordable cost thanks to Hangcha's vertical integration and automated manufacturing. Together, these decisions have led to Hangcha Group being considered a global leader in material handling equipment manufacturing.

HANGCHA AMERICA'S UNITED STATES PRESENCE

HANGCHA

HANGCHA AMERICA

HANGCHA AMERICA: HANGCHA GROUP'S AMERICAN SUBSIDIARY

As a part of Hangcha's globalization strategy, HC Forklift America Corporation (HCFA) was founded in Charlotte, NC. Since 2017, HCFA has built a nationwide dealer network, distribution centers in key locations within the United States, a large parts distribution warehouse in Rock Hill, SC that features an AS/RS system, parts distribution centers in key locations within the United States, and a team of aftermarket support personnel to ensure that our dealers and end-users receive the technical support and parts needed to keep their equipment running. This culminates in a U.S. based team being able to successfully sell and support Hangcha's product line for our customers.

HANGCHA AMERICA'S LITHIUM-ION ADVANTAGE

HANGCHA AMERICA: THE LITHIUM-ION ADVANTAGE

As a part of Hangcha's New Energy Initiative, Hangcha developed a full line of Lithium Iron Phosphate (LiFePO₄) powered material handling equipment. These battery systems, manufactured by Hangcha, allows users to make the switch from both lead-acid or I.C. powered equipment to rapid charging, long lasting, maintenance-free, lithium-ion equipment. This equipment provides end-users with efficient equipment that can run in applications ranging from light duty through harsh multi-shift applications while also providing a substantial ROI.

HANGCHA AMERICA:

A FULL LINE MATERIAL HANDLING EQUIPMENT PROVIDER

Hangcha America is proud to offer a tailored full line of material handling equipment ranging from ITA's Class One through Seven and speciality equipment for the U.S. market. These innovative machines are built to U.S. standards and provide reliable equipment that customers continue to depend upon, day after day. Included in this is Hangcha's full line of lithium-ion products. Designed and built by Hangcha, this expansive range of models represent the latest in material handling technology. Hangcha's full line of material handling equipment provides end-users with selection of equipment to maximize productivity in their application.

HANGCHA AMERICA'S SELF-PROPELLED SCISSOR LIFTS

HANGCHA AMERICA: AN AERIAL WORK PLATFORM PROVIDER

Hangcha America is proud to offer aerial work platforms as a part of our equipment offerings in the United States. Produced in Thailand, these new compact, self-propelled scissor lifts allow for end-users to maintain their manufacturing facilities, industrial sites, and work in construction sites. Hangcha's electric, self-propelled scissor lifts are powered using Hangcha's Lithium Iron Phosphate (LiFePO₄) battery packs. This chemistry allows for less battery maintainance and run longer than the typical lead acid batteries. Thanks to this chemistry and their compact, rugged design, these self-propelled scissor lifts are able to take on the day-to-day challeges found in rental house, construction, and manufacturing applications.

HANGCHA AMERICA'S AGV'S, AMR'S & AUTOMATED SYSTEMS

HASL: AN AGV, AMR, & AUTOMATED SYSTEMS PROVIDER

In 2012, Hangcha Group launched its first Automated Guided Vehicle (AGV) system. Since then, Hangcha has designed and used its series of AGV's, AMR's, & Automated Systems to build over 200+ custom tailored projects for customers all around the world. In 2025, Hangcha opened Hangcha America Smart Logistics Solution (HASL) in Houston, Texas. This is Hangcha America's AGV, AMR, and Automated Systems provider. HASL brings over 14 years of AGV, AMR, and Automated Systems experience to the United States. Their dedicated engineering team works closely with the customer to understand their needs and increase productivity and efficiency in an operational environment. By pulling from Hangcha's extensive portfolio of automated equipment, HASL is able to take customer's challenges and turn them into well executed, automated solutions.

Universal Lithium Battery Supply

UNIVERSAL LITHIUM BATTERY SUPPLY: A LITHIUM-ION BATTERY AND CHARGER PROVIDER

With the success of Hangcha's lithium-ion equipment in the United States, Hangcha America wanted to provide customers with a way that they could see the same benefits in their other major brand's equipment. In 2024, Hangcha America founded Universal Lithium Battery Supply (ULBS) in Katy, Texas. ULBS provides advanced Lithium Iron Phosphate battery packs and chargers for material handling equipment across all major brands. With a dedicated factory, in-house battery design expertise, and extensive experience in lithium-ion battery packs in material handling equipment, ULBS delivers engineered, drop-in solutions for new and used electric equipment. ULBS battery packs give customers the ability to convert their existing lead-acid equipment in under 15 minutes and gain a maintenance-free, safer, more efficient, and cost effective alternative.

HANGCHA AMERICA: AN INTRALOGISTICS SOLUTIONS PROVIDER

HANGCHA AMERICA: AN INTRALOGISTICS SOLUTIONS PROVIDER

As an intralogistics solutions provider, Hangcha America understands what it takes to maximize productivity and efficiency in a customer's space. With a full catalog of material handling equipment, aerial work platforms, lithium-ion batteries, automated guided vehicles/robots, conveyor systems, and racking, Hangcha America has the right equipment for any application. When combined with Hangcha's automated systems, telematics, and warehouse design, Hangcha America is able to maximize operational efficiency and productivity in a space. Hangcha America works closely with customer to understand their needs. Then with the help of our U.S. based engineers, we pick equipment from our from our extensive product portfolio, figure out which systems are needed, and create a custom plan that allows users to get the most out of their operation. This is why Hangcha America is the intralogistics solutions provider.
